Fax: (845)227-4145

2502 State Route 52,
Hopewell Jct., NY, 12533

Interior Firefighter: Performs fire attack operations from inside and on top of burning structures. Can perform all duties of an exterior firefighter as well.

Exterior Firefighter: Performs firefighting operations from outside of burning structures. Such examples of stretching hose lines from apparatus, forcing doors to gain entry into structures, and placing ladders on the building for emergency egress and ventilation.

Fire Apparatus Driver: Safe operation of fire apparatus to and from the scene of emergencies and training exercises. Operates pumps, generators, and various other vehicle-mounted equipment during these scenes. Knows the location of all tools and equipment within the vehicle they are responsible for operating. Drivers must be familiar with the roads around town. (We will train you on this)

Emergency Medical Technician: Provides Basic Life Support level care to patients at scenes of emergency. This can include BLS-level treatment on scene and during transport to a local medical facility. Will also assist Paramedics during Advanced Life Support level calls.

Ambulance Driver: Is responsible for the safe operation of the ambulance to emergency scenes and medical facilities as well as returning to the station. Assist Emergency Medical Technician with the care of a patient, this includes helping lift and move patients, retrieving items from the ambulance as needed, and other assistance as requested. Drivers must be familiar with roads around town as well as routes to major hospitals from areas of town. (We will train you on this)

Scene Support: The Support Team provides canteen services to members operating on the scene of longer-duration incidents. This can include bringing drinks to a scene on hot/cold days. This may also include providing meals for members operating on the scene of long-duration incidents such as structure fires. Members of Scene Support are located in a safe area while operating on scene.

Fire Police: The Fire Police's primary operation is to divert traffic away from an emergency scene or in some circumstances control traffic flow through an emergency scene. This usually involves road closures or detours. Fire Police are also responsible for access to the scene as they are usually the first person the public will interact with while trying to access an emergency.
